

7.) *Gute Forschung braucht Zeit* Die Entwicklung fundierter Projekte und deren Durchführung sind nicht vereinbar mit kurzen Zeitverträgen. Der durch Letztere erzeugte Druck veranlasst die Forscherinnen und Forscher dazu, Kleinstprojekte ohne substanziellen Erkenntnisgewinn durchzuführen und kleinteilig zu publizieren. Nur Vertragslaufzeiten, die durch sinnvolle Begrenzungen die Möglichkeiten zu längeren Projektplanungen (auch für den wissenschaftlichen Nachwuchs) geben, erlauben die im internationalen Wettbewerb unentbehrliche hohe Qualität der Forschung.

Präsident der Universität Göttingen*; Professor em. Dr. Peter Weingart *Vormals Direktor des Instituts für Wissenschafts- und Technikforschung an der Universität Bielefeld*; Professor Dr. Rüdiger Wolfrum *Direktor am Max-Planck-Institut für ausländisches Recht und Völkerrecht in Heidelberg*; Professor Holger Wormer *Professor für Wissenschaftsjournalismus am Institut für Journalistik der Universität Dortmund*

### **The Europe China Research and Advice Network (ECRAN)**

The Europe China Research and Advice Network (ECRAN) was established with funding from the European Union on the 17th January 2011. This three year project has been under discussion for some time, and is partially a continuation of the work done by the Europe China Advice Network (ECAN). The ECRAN consortium is led by Steinbeis GmbH and Co KG für Technologietransfer, Germany, and includes Chatham House and the University of Nottingham in the UK, and GDSI in Ireland. I am the ECRAN Team Leader.

The aims of ECRAN are to provide policy briefings, both short and long term, to the European Commission, to operate as a bridge between the EU policy making community and academics and specialists on China, and to create a stronger sense of community amongst those working on aspects of China within the EU. We aim in particular to provide briefings, publications, seminars, annual conventions, and a web site on which material on EU China relations will be placed (this will be in operation shortly), for discussion and analysis. Our three key areas are to focus on the politics, economy and society of contemporary China and provide advice and research within these.

It would be excellent to involve anyone interested and engaged in China-related work in the EU, and to have them amongst our network of expertise. We would be arranging funded research for short and longer term projects, details of which will start to be sent out this month.

Anyone interested in being involved and wanting further details of the project should contact me direct on [Kerry.Brown01@gmail.com](mailto:Kerry.Brown01@gmail.com).

Dr Kerry Brown Team Leader, ECRAN (ENDS) -- Dr Kerry Brown Head of Asia Programme leading the Europe China Research and Advice Network (ECRAN) Chatham House

## **TOChina Summer School (27. Juni - 8. Juli 2011)**

The TOChina Summer School tackles the complexity of today's global China through a 2-week, super-intensive program featuring leading China experts from around the world, a vibrant international class, and an informal environment designed to encourage in-depth discussions and first-rate networking. European experts feature prominently in the faculty line-up, as you can see.

Training runs Monday to Friday, from 9.30 am to 5 pm. Lectures address both China's long-term, structural transformations, and the most topical trends informing current international debate. The TOChina faculty is selected to provide timely, cutting-edge insights, engage in extensive Q&A sessions, and devise case-studies and role-games for maximum impact. Seminar sessions led by young scholars from the Asia-Pacific region provide further opportunities for discussion in a more informal context.

Among confirmed speakers for this edition are Richard Baum (University of California Los Angeles), Kerry Brown (Chatham House), Kent Deng (London School of Economics), Gustaaf Geeraents (Vrije Universiteit Brussel & BICCS), François Godement (Sciences-Po & Asia Centre), Louis Kuijs (World Bank China office), Geun Lee (Seoul National University), Anja Senz (University of Duisburg-Essen), Ashley Tellis (Carnegie Endowment for International Peace), Gudrun Wacker (German Institute for International and Security Affairs), Wang Yiwei (Fudan University).
