A general introduction to this preliminary edition is to be found in the first volume.

Editing the Jaimini-Kalpa required access to all the Jaiminīya Gānas. None of the Gānas had been published, when I discovered the unique manuscript containing the Jaimini-Kalpa and the Jaimini-Paryadhyāya in 1966, and started the project of editing them with the Bhavatrāta-Vṛtti. The Jaiminīya-Grāmegeya-Gāna (JGG) was published (by Vibhūtibhūṣaṇa Bhaṭṭācārya) in 1976, and in 1975, I got a manuscript containing all the Jaiminīya Gānas in the version of the Nampūtiri Brahmins of Kerala (written from his memory by Malameel Parameśvaran Nampūtiri).<sup>1</sup> In 1985 I got a manuscript of the Tamil version of the Jaiminīya-Ūha-Gāna (JŪha) and the Jaiminīya-Ūhya-Gāna (JŪhya) (written by T. Rājagopāla Aiyangar). I was then in a position to start analysing them and to start preparing the four synopses/indexes published in this volume.

As I began with the Nampūtiri version of the JŪha and JŪhya, its reference appears in these synopses/indexes first, and the Tamil version reference is given thereafter in parentheses, followed by the letter T. There are slight differences in the textual division between the two versions, and it is clear that on the whole the Tamil version has better preserved the original division.<sup>2</sup> Moreover, the Tamil version alone has preserved the names of the sāmans; the Nampūtiris refer to the sāmans by giving their position in the collection

---

<sup>1</sup> The Nampūtiri version of the Jaiminīya-Ārcika, the JGG and the JĀrG was published in 2013 by K. A. Ravīndran with the title *Jaiminīyasāmavedasaṃhitā — Text of Kerala tradition (Ārcika, Sāma and Candrāsāma portions, vol. 1-2, Delhi: Nag Publishers.*

<sup>2</sup> However, in the case of JŪhya 1,2,21 (*yaṇva* sāman), the Tamil version records only one verse, while the Nampūtiri version (3,9) has three verses; here the Nampūtiri version is in accordance with JK 2,19, where this sāman has to be sung on three verses to achieve the triṇava stoma prescribed for the fifth day of the *pr̥sthya śaḍaha*. In this case only the Nampūtiri version has preserved the original JŪhya tradition. The *yaṇva* sāman is used also on the fifth day of the *trikakubdaśarātra* (JK 4,114), which likewise has triṇava as its stoma (JK 1,9,8e), but in this case the *yaṇva* sāman is to be chanted on one single verse to achieve the required stoma for the *madhyandina pavamāna*. Again the Nampūtiri version (15,7) has three verses, the Tamil version (JŪha 3,3,13) a single verse.

(divided into *oottus* or 'recitals'). It is the Tamil version, therefore, that is referred to in this edition of the Jaimini-Kalpa. The numbering of the Tamil version is followed also in the excellent edition of the JŪha and JŪhya by G. Shadangi (2017), provided with a good introduction (in Sanskrit).

The *āmahāyava* sāman (JGG 6,1,13, the 13th sāman composed on JS 1,49,1), for instance, occurs eleven times in the JŪha, for the first time in its very beginning (JŪha 1,1,1). In almost every case, the verses on which the *āmahāyava* sāman has been adapted differ in the JŪha. To know for certain which of these eleven *āmahāyavas* is meant in each context of the Jaimini-Kalpa, it was necessary to compile these indexes containing all necessary data.

The first two indexes follow the order of the JŪha and JŪhya, respectively. The first line gives the reference in the Kerala and Tamil versions and the name or names of the sāman (sometimes different sources give different names to a particular sāman). The next line gives the occurrence of this sāman in the JGG or JĀrG and its *yonī* verse in the Jaiminīya-Ārcika (JS). The third line gives the verse or verses on which this particular sāman has been adapted in the JŪha or JŪhya and its metre.<sup>3</sup> The fourth line gives the Jaimini-Kalpa reference and the rite<sup>4</sup> in which this Uttara-Gāna application is first utilized, adding a specification of the context (e.g., MP = madhyandina-pavamāna, 1P = first pṛṣṭha laud, ĀP = ārbhava-pavamāna, 2U = second uktha, 1R3 = third sāman of the first nightly round), and occasionally a JB reference. The information contained in the fourth line could be obtained only from the Jaimini-Kalpa, where the first occurrence of an Uttara-Gāna sāman marks its ritual context, agreeing with its position in the Uttara-Gāna. (In the Kalpa text, the first occurrence is marked by printing the JŪha or JŪhya reference in bold face.)

The third and fourth indexes are inverted, following the order of the JGG and the JĀrG, respectively, and giving in succession all the places in which the sāman occurs in the JŪha or JŪhya. It should be noted that by far not all sāmans of the JGG and JĀrG are to be found in the JŪha or JŪhya.<sup>5</sup> Thus the first JGG sāman to be found in the JŪha is JGG 1,1,5 composed on the verse JS 1,1,3 *agnim dūtam vṛṇīmahe*. This *vaiśvamanasam* sāman or *ādityasāma* (these are the names given in the Jaiminīya-Ārṣeya-Brāhmaṇa = JĀrṣB) is the first (and in this case the only) sāman recorded in the JGG on this verse: this important order is indicated in the index by a number in parentheses, in this case (1). But for instance JGG 1,4,4 is recorded in the JGG as the fourth sāman composed on the verse JS 1,4,1, and is therefore marked (4).

<sup>3</sup> The metre information is not so essential, and its recording is incomplete in this preliminary edition.

<sup>4</sup> Unfortunately I decided to give the name of the rite in its stem form in the contents of the Vikṛti-Kalpa: this led to rather unnatural constructions when the name consisted of preceding declined attributives with the final in the stem form. This mode of reference, regrettably transferred to these indexes, will be rectified in the final edition by returning the original nominative form of the name.

<sup>5</sup> The remaining sāmans belong to rites mentioned in JK 1 but left undefined and others forgotten, comparable to those mentioned in the Kṣudrasūtra of the Kauthumas or in the last chapters of the PB.
